

```
const express = require("express");
const ejs = require('ejs');
const app = express();
//设置ejs
app.set('view engine','html');
app.engine('.html', require('ejs').__express);
//设置视图
app.set('views', __dirname+ "/views");
//设置静态资源
app.use(express.static(__dirname+ "/public"));
//设置处理post请求参数
const bodyParser=require("body-parser");
app.use(bodyParser.urlencoded({extended:false}));

app.get("/", function(req, res) {
    res.render("index");
});

app.listen(9999, function() {
    console.log("服务器正在监听中");
});
```
